7. Formulation of the conclusion of the thesis	A – Excellent
8. Student's approach to the Master's thesis	A – Excellent

I recommend the submitted thesis for defence and propose the following assessment:

A – Excellent

Comments on the Master's thesis:

Bsc. Akhilesh Kumar became interested in the topic of his qualification thesis already in the first year of his Master's studies, when he started to conduct a literature research. He started to write the theoretical part of the thesis in the winter semester of the second year and sent the text to me regularly for checking. He also regularly consulted me on the content of the thesis. During the actual writing of the whole thesis he was independent and always incorporated my comments. He showed a fair amount of independence when working in the laboratory, both in the production of samples and their subsequent analysis. I can summarize that the student's approach to the elaboration and completion of the qualification thesis was responsible.
