

PLAYBAG

WHAT'S PLAYBAG?

The Playbag project is looking for design ideals within the garment accessories sector. In our workshop you will not only see urban and traditionalbags, as we try to produce unique and specialised products as well. The basis of our products are functionality, quality, simplicity and esthetics. We prioritise practicality above beauty, however this is included within the efficient functionality of our products. We insist on only using the best materials and components in keeping with our ideals. We are not trend followers but trend setters, each of our products isan individual project. We continually improve and develop our products striving for perfection. The complete process from initial idea to final manufacture happens in our workshop. Each model line is produced in a limited quantity. Traditional Czech manufacturing, design, new technologies and quality materials are the basis of the brand Playbag.
